## INTRODUCTION

### WORLD CLASS WEIGHING SYSTEM FROM LAUMAS ELETTRONICA, ITALY

**Tiger Trade Corporation (TTC)** is a concern of **Tiger Steel Bangladesh Limited (TSBL)**, started journey in the year of 2019 with a prestigious international brand **LAUMAS ELETTRONICA, ITALY** to providing best quality of Weighing System in Bangladesh.

**LAUMAS Elettronica** has operated in the INDUSTRIAL WEIGHING and BATCHING market since 1984, with applications tailored for a wide variety of sectors. LAUMAS is presenting in over **Ninety Countries around the world** through a dense network. Through careful analysis of customer needs and the presence of a sophisticated internal research laboratory, LAUMAS Elettronica manufactures reliable precision products, characterized by **excellent quality/price ratio, certificates and compliance** with relevant industry standards on a national and international level.

**In 2007, LAUMAS** begins investments that will lead to the creation of the new department of Research and Development, with an EMC test laboratory. It is a significant investment, which reached the goal of acquiring the latest equipment to carry out tests on new products that arise from ongoing research.

**In 2018, LAUMAS** starts a partnership with the company **MICRO ASSEMBLAGGI**, a leading producer of electronic boards with SMT and THT technology, which allows it to control the entire production chain of its transmitters and weight indicators while continuing to ensure **100% Made in Italy quality**. It is our great opportunity to work with them as local agent in Bangladesh.

We have well trained calibration engineer from **Bangladesh Standards and Testing Institute (BSTI)** and experienced technical support team for Weighing System Consultancy which will help you to take decision about your appropriate system and perfectly completion of your project as per mutually agreed requirements.

All components of Weigh Systems are sourcing from worldwide proven and reputed manufacturer which are **OIML (International Organization of Legal Metrology)** approved equipments. We are channel partner of **"LAUMAS"** to provide you the highest quality weighing system and automation for your requirement.

So, we hope that we can fulfill your requirements regarding the **COMPLETE WEIGHING SYSTEMS**.

## INTRODUCTION

**LAUMAS** produces load cells, transmitters and weight indicators that are used in **weighing and batching systems** in the most diverse industrial sectors. **LAUMAS** operates in the **B2B** market and offers its products to **machine and plant manufacturers, system integrators** and a dense network of resellers who provide **complete assistance to the end customer**. These are some of the **prestigious brands**, have chosen the quality of LAUMAS products.

## LAUMAS CORPORATE POLICY

### **Innovation**

A focus on continuous innovation in our products and in the production processes.

### **Pre-sales consultancy**

Needs analysis and selection of the most suitable products that meet the customer's needs.

### **High level of computerization**

Fast and effective order management, product traceability and shipment tracking.

### **Quality/price ratio**

Search for a good balance in the manufacture of reliable, precise and cost-effective products.

### **Webinar & Training**

Continuous training using webinars, corporate training and video tutorials.

### **Research and development**

Designing technologically advanced products that are tested in our laboratories.

### **Warehouse of 2,000 m<sup>2</sup>**

More than 1,500 items ready for delivery for fast turnaround times in order processing.

### **Catalogs**

Wide distribution of products through the periodic publication of brochures and catalogues.

### **After-sale services**

Fast and effective after-sale service for technical assistance.

## QUALITY CERTIFICATIONS

**LAUMAS** is present in over **90 countries around the world** through a dense network of **resellers**.

The components used in the construction of **LAUMAS** industrial weighing systems - from the load cells to the weighing indicators and transmitters and the scales - are **approved** in accordance with the parameters laid down by the most prominent national and international bodies, from which **certification** has been obtained.

Here you can see the documentation relating to system certification and the most significant national and international products.

UNI EN ISO 9001 - UNI EN ISO 14001 by

EC-TYPE APPROVAL (NAWI - MID/AWI)

ATEX CERTIFICATION
